

BOLD STROKES

Make a striking design statement with Tangram-Trace. Define space with strong geometric lines suspended at angles you choose. All seamlessly connected with straps flowing into fixtures as one.

Tangram empowers designers to invent their own visual language and express it throughout a space with uniquely assertive lighting arrays.

Product shown: Tangram-Trace, L11 configuration

TANGRAM-TRACE

With Tangram-Trace, construction details are muted, so the visual flow from strap through fixture is smooth and effortless, even when viewed from above. The look is pure modern sophistication that confidently defines a space.

With a 1.1-inch profile, Tangram-Trace offers a rich illumination, a quality not often found in luminaires so thin. Low, regular, and high output options range from 670 to 1,027 delivered lumens per foot.

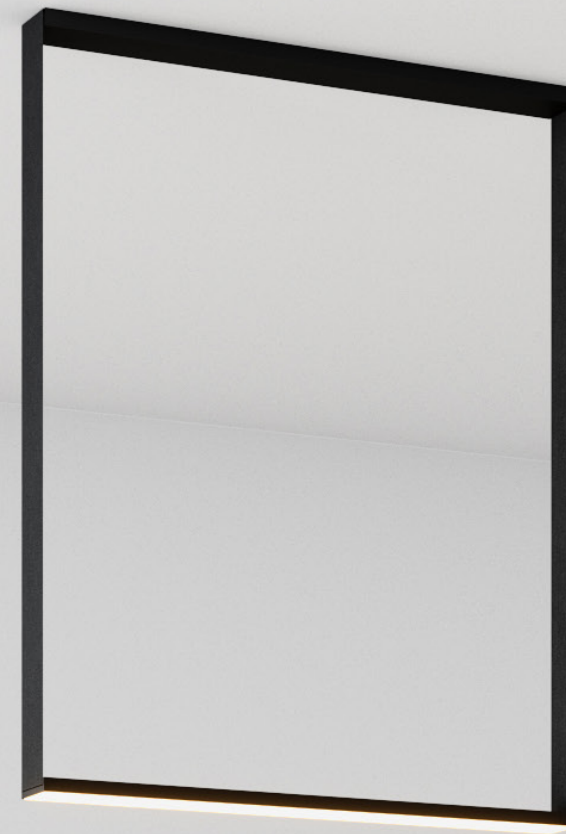

Available in 2', 4' and 6' lengths.

The premium prismatic lens relates texturally to the strap material, providing luxuriously diffuse light.

HIGH DRAMA

Tangram-Trace stands out in applications where the straps can paint a bold picture, strongly differentiating a space. Perfect for conference and executive areas, hospitality applications and reception space.

Products shown: Tangram-Trace, L06 and modified L07 configurations

Whether you look for convex or concave forms, matching or complementary, with Tangram-Trace, latitude is the name of the game.

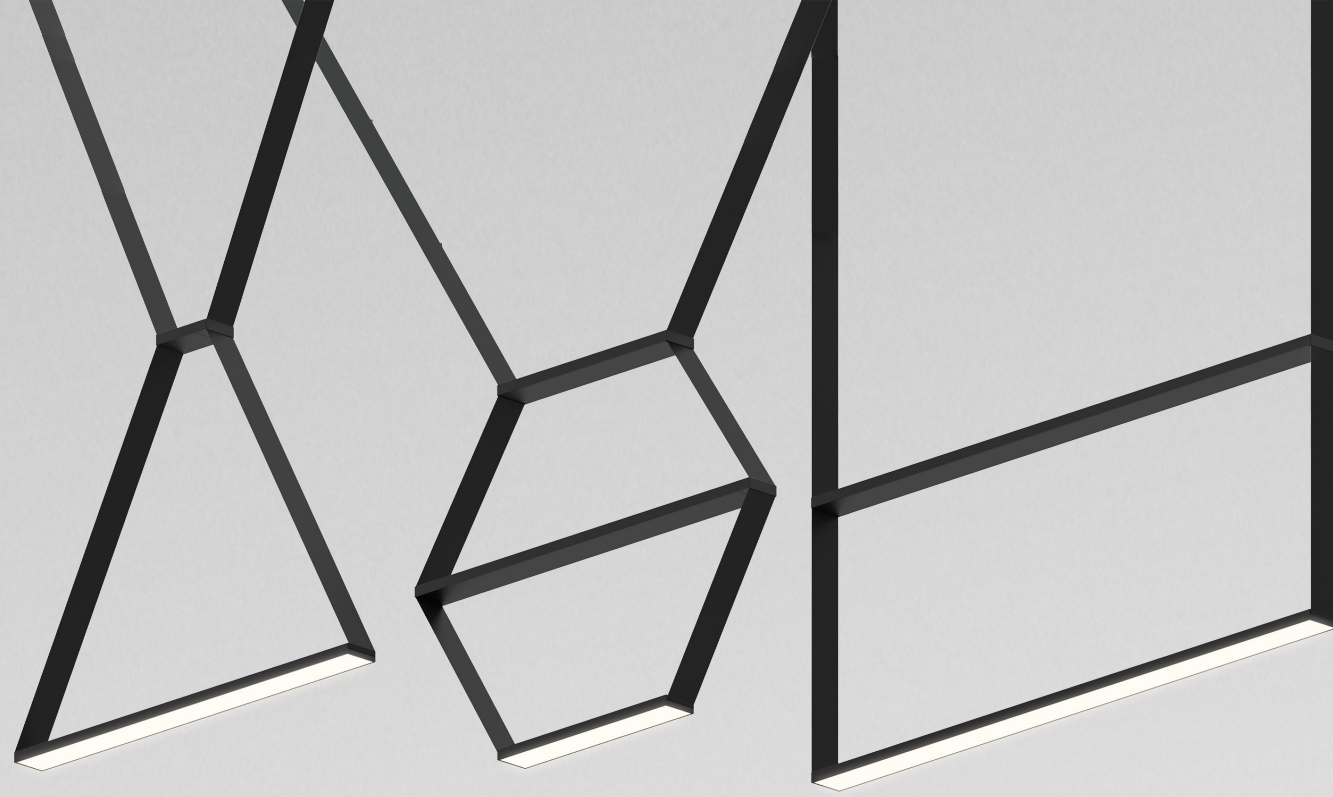

GAME PIECE

With Tangram the canopy is not something you hide, it's a design tool you can play with. Straps can be made to appear to flow discreetly out of the ceiling, or canopy elements can mirror and amplify the geometry suspended below. It's your play.

Products shown: Tangram-Trace, 74280-24, 74280-48 & 74280-72 configurations

BOLD MOVES

Spacers direct the path of the strap between fixture and canopy. Pull straps in, push them out or create a parallelogram. Creating visual movement is just one design strategy.

DARE TO PLAY

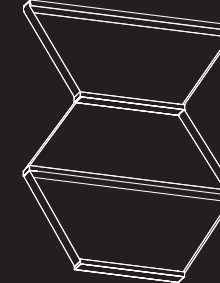

Choose from 12 preconfigured options. Define a single parameter – overall arrangement height – to complement the space. Or customize your own configurations for infinite possibilities. Our team is here to discuss your ideas.

ALL IN THE DETAILS

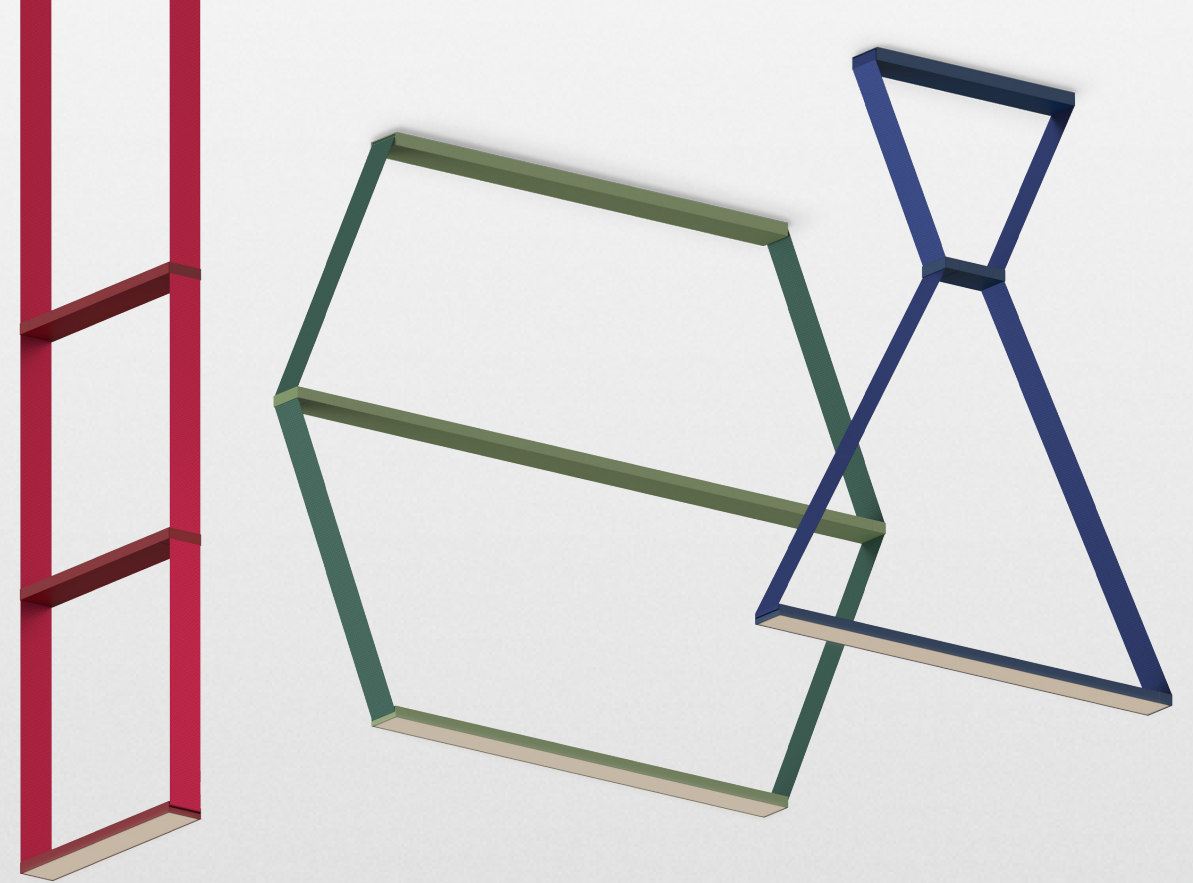

Construction details matter, especially for delivering a seamless, clean look. Tangram's 4-inch straps flow effortlessly into light fixtures while connections with the canopy are clean and unobtrusive.

With no visible fasteners and a neatly finished top of fixture, Tangram can be used in spaces where it is seen from above.

PLAY WITH SHAPES AND COLORS

Straps come in 5 decorative colors that make your design plans even bolder.

Whether you are looking for a one-color fixture, a monochromatic feel, or a completely eclectic color combo, our team is here to help make your vision come true.

Refer to spec sheets for complete color chart including Pantone matching, RAL & paint color suggestions as well as Eureka's felt color match.
